————— The most powerful energy advisor available —————

Introducing Emberpulse®, your energy management system

Emberpulse® is an intelligent in-home system that monitors and advises you how to reduce your energy costs and earn more from your solar system.

Emberpulse® will identify specific saving opportunities for your home that can save you hundreds of dollars each year.

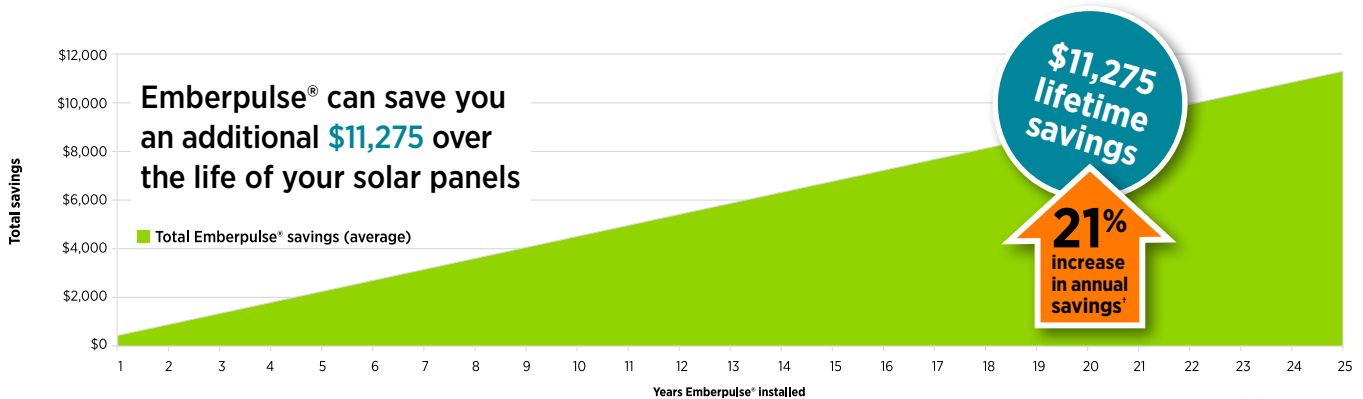

Emberpulse® can be installed as part of a new or existing solar system, or for homes considering solar to reduce their energy costs.

- ✓ Let Emberpulse® find you the cheapest energy plan each year based on your unique energy usage requirements (average \$451 saving per year)*
- ✓ Guaranteed solar outage alerts, or we'll pay your lost revenue#
- ✓ Home battery recommender – Emberpulse® will pinpoint when it makes financial sense to invest in a battery
- ✓ Install Emberpulse® before installing solar and let Emberpulse® calculate the perfect solar system for your needs
- ✓ Bill forecasting and alerts – set a budget and Emberpulse® will help you avoid bill shock
- ✓ Home control of air conditioning, lights and plug loads^
- ✓ 24/7 Live data monitoring

emberpulse®

Boost your solar savings by 21% per year

Emberpulse® continually monitors your unique energy profile and solar system to ensure you are maximising your savings. For example, Emberpulse® finds the average customer \$451 in yearly savings on their electricity bill. That's an additional \$11,275 in savings over the life of your solar panels*.

Guaranteed solar outage protection

Emberpulse® also provides solar monitoring. Did you know that solar system outages usually go undiagnosed for up to 4-5 months, costing you over \$600.

Emberpulse® guarantees to protect your solar investment by notifying you of an outage – if we don't, we'll pay you for your lost solar revenue. This is an offer not available anywhere else.
